

PLANTING PLAN

# Drought-Tolerant Native Haven

These hardy natives are built for the Australian climate, surviving long dry spells with little or no supplementary water while still feeding local wildlife.

## How to use this plan

1. Mark out your bed and set plants out (still in pots) using the spacing column.
2. Place taller and wider plants to the back or centre, lower plants to the front or edges.
3. Group by light and water needs so each plant gets the right conditions.
4. Plant, mulch, water in well — then tick each plant off as you go.
