

PLANTING PLAN

Native Screening Shrubs

Australian native shrubs make some of the best screening plants: they shrug off our climate, feed local birds, and form dense privacy with far less water than exotic hedges. These natives all earn their place as a living screen.

How to use this plan

1. Mark out your bed and set plants out (still in pots) using the spacing column.
2. Place taller and wider plants to the back or centre, lower plants to the front or edges.
3. Group by light and water needs so each plant gets the right conditions.
4. Plant, mulch, water in well — then tick each plant off as you go.
